WHY CLOTH NAPPIES?

It is estimated the average child will use around 6,500 nappies - equivalent to around 1 tonne of plastic waste that ends up in Landfill.

Over the past four years we have had an average 345 babies born in the Moira Shire. If all of those families used disposable nappies that is a staggering 345 tonnes of waste that can be avoided. Organic material sent to landfill breaks down and eventually releases methane, a greenhouse gas that is 21 times more potent than carbon dioxide.
